Experience

Licensed in Florida since 1990, Dr. Gruber has collected many impressive credentials over the years, including research projects and publication in prestigious medical journals and textbooks. In addition, he has more than 22 years of experience in the clinical evaluation and management of spinal conditions. After 18 years serving as the Medical Director of a multidisciplinary surgical spine care practice in Tampa Bay, he found a new passion in identifying minimally invasive solutions for patients who need surgery for their spine conditions.

Not only has Dr. Gruber worked extensively with conventional methods of spine treatment and traditional spine surgeries, he is now at the forefront of spine care with the minimally invasive procedures that have been performed extensively at Laser Spine Institute.
