Experience

A dedication to excellence in orthopedic spine surgery and sports medicine make Timothy Luke, M.D., a valued surgeon with Laser Spine Institute, the leader in minimally invasive spine surgery. His medical perspective is unique because he has firsthand knowledge of how patients suffering from neck and back pain may not be able to fully experience their own passions in life. His personal experience comes from suffering a broken neck in a sports-related injury.

Dr. Luke's knowledge and expertise have been widely recognized by the patients he treats, and by colleagues exposed to his research presented before the Arthroscopy Association of North America, and the Western Orthopedic Association.
